WE HAVE HISTORY

As a local business with roots in Batavia, Advanced Disposal has the historical knowledge, deep community relationships, equipment and manpower to ensure a seamless continuation of services in the Tri-Cities. We have developed excellent working relationships with your city staff to ensure Tri-Cities residents continue to receive the highest quality of service they’ve come to expect.

We’re an Economic Engine for the Tri-Cities

With operations in Batavia and Geneva school districts, Advanced Disposal’s hauling division and transfer station accounts for $217,000 in annual property taxes and employs 212 people full time, with an annual payroll of more than $11.7 million ($55,400 average). We pay more than $40,000 annually for utilities/electric to the City of Batavia.

We Can Ensure Continuity

Tri-Cities residents know us and depend on us for solid, consistent service. Continuing our partnership with the Tri-Cities reduces the risk of service disruptions and delays, earlier/ later pickup schedules and insufficient inventory of new trash and recycling carts that may occur if you switch to a new service provider.

We’re Committed to Sustainability

Our residential trash and recycling trucks run on environmentally friendly compressed natural gas. Our CNG-powered trucks deliver significantly reduced emissions and quieter operation – something everyone in the Tri-Cities can get behind.
We’re a Good Neighbor

Advanced Disposal proudly partners with the Tri-Cities through a variety of sponsorships and free/in-kind services, including ongoing participation in local parades and green/recycling events in Batavia, Geneva and St. Charles.

We Invest in the Community

We spend more than $100,000 annually with businesses in the Tri-Cities/Kane County area, and we invest tens of thousands of dollars in sponsorships of various events and free services throughout the community.
