September 12th Electronics Collection: Registration Closed

Registration for the September 12th, 2020 electronics collection event is now closed. There are no available appointment slots at this time.

The September 12th, 2020 electronics collection will continue the 2020 regular collection season (April – October) (April and May collections were not held due to the stay-at-home order). Macon County Environmental Management intends to schedule one more electronics collection event in October to finish out the regular collection season.

Residents who were not able to register for the September 12th, 2020 electronics collection event are strongly encouraged to visit www.MaconGreen.com to learn more about electronics recycling in Illinois and sign up for email announcements. As soon as events are scheduled an email blast is sent out to those that have registered their email address for email announcements. Signing up for email announcements is the easiest, quickest way to stay informed of recycling or proper disposal events and programs held by Macon County Environmental Management or others in Macon County.

Further information may be obtained at www.MaconGreen.com, by emailing EnvironmentalManagement@co.macon.il.us, or by calling the Macon County Environmental Management Department at 217-425-4505.

Macon County Environmental Management would like to thank Macon County residents for their patience and understanding as we work to meet the demand for these collection events.

#####

Dear News Director: The Macon County Environmental Management Department is a governmental organization. The above information is provided as a public service. We would be grateful if you would publish/broadcast this announcement. Thank you for your consideration.
