Recycling Information

Cans and Lids
- Cans are small and screw on. Please replace plastic caps on empty plastic bottles, jugs or jars. Loose plastic caps are trash as they cannot be captured by the sorting system as they are too small. Loose metal caps and lids are accepted in the recycling bin. If the container and the cap are different materials, such as a glass bottle with a metal cap, then they both go into the recycling bin separately.
- Lids are thin, flat and snap on. Plastic lids from things like margarine, yogurt and some sauces are NOT recyclable and should go in the trash. The tub shaped containers are recyclable.

Plastic Bag Recycling
- Please do not place recyclable materials in plastic bags inside of the collection bin. Place all recyclable items loose into the bin/cart for collection. Plastic bags are the biggest contaminant at the sorting facilities and are a detriment to the program. Plastic bags and plastic film are recyclable, but only at grocery store drop-boxes. Check your local store for these drop-boxes and to verify acceptable materials. Please visit www.plasticbagrecycling.org for more information.
