

Environmental Integrity

Advanced Disposal is deeply committed to ensuring a clean and safe environment for our employees, our customers, and our communities. We consider environmental stewardship of utmost importance and believe that our true business is making the world a cleaner, more beautiful place to live, work and play.

We approach all of our operations with a keen eye on safety and environmental care. Our landfills are built with state-of-the-art engineering designs and materials. We use extreme caution when constructing these sites to ensure the integrity of the design and materials are maintained. Daily operations are just as important as construction. Advanced Disposal uses only state certified, experienced equipment operators and a certified landfill operator is always on site when the facilities are accepting waste. We fully comply with all local, state and federal regulations, and our sites are inspected annually at a minimum. With 39 landfills to maintain, operate and potentially expand, we will always remain vigilant to the protection of our natural environment while providing an integral infrastructure asset for the safe and healthy disposal of the community's waste.

Environmental compliance is equally important in our collection operations. Advanced Disposal operates a fleet of more than 3,100 trucks that must be operated and maintained in an environmentally sound manner. Advanced Disposal follows all local, state and federal regulations in regards to its operating fleet. The trucks are maintained nightly with rotating schedules to make sure all parts of the truck are operating in a safe and proper way. Only approved fuels are used including alternative fuels such as compressed natural gas (CNG). Currently, about 16% of our fleet runs on CNG, and we are always looking for opportunities to grow that number. All waste generated in the maintenance of our fleet are disposed of in a proper manner with the necessary documentation of proper disposal.

Lastly, Advanced Disposal has always had a strong commitment to recycling through our extensive residential and commercial collection operations. All offices participate in some sort of recycling program, whether it's recycling paper, aluminum cans, plastics or a combination of all. Many of Advanced Disposal's recent acquisitions and milestones stem from our goal to be a fully integrated environmental services company and prove our commitment to a cleaner, greener world. We own and/or operate 21 recycling processing and composting facilities throughout the Eastern United States and consistently look for opportunities to create a more sustainable workplace for our customers and ourselves in regards to environmental care and economies.

In a business where the end results are clean and safe communities, Advanced Disposal takes its environmental stewardship responsibilities very seriously. Our employees, our neighbors and our families live in the communities we service. We believe it is our primary job to ensure that these communities are clean, safe and healthy for many years to come.
