

CONSTRUCTIVE SOLUTIONS FOR YOUR CONSTRUCTION NEEDS

CONSTRUCTION

WASTE AND RECYCLING SOLUTIONS FOR THE CONSTRUCTION INDUSTRY.

Advanced Disposal understands the unique situations and time constraints the construction industry faces. In fact, one of our strengths is our ability to be flexible and adapt to your needs. Have additional requests? Give us a call; we specialize in problem solving.

YOUR NEEDS

Quick response time

To avoid unscheduled work interruptions.

Changing service requirements

Because your schedule changes from week to week, job to job.

Variety of service options

Paying for only as much capacity as you need.

Disposal and recycling options

Finding the best, most economical and ecological way to dispose of varying materials.

Environmental and economic sustainability

Achieving economic growth while improving quality of life and the environment.

OUR SOLUTIONS

Service guarantee

Advanced Disposal responds when you call. Guaranteed.

Quick response time

Advanced Disposal tailors our schedule to match yours.

Need-based container types

Just the right container size or type for the job, all in compliance with LEED certification requirements if requested.

Ongoing waste needs analysis

Advanced Disposal evaluates your needs to ensure that you receive the most economical disposal option, including recycling services.

Helping you save money and the environment

Advanced Disposal provides various environmental solutions that balance your needs for environmental responsibility and a strong bottom line.

SERVICE FIRST. SAFETY ALWAYS.

It's our commitment to you. From safe and proper collection and transportation, to environmentally sound treatment and disposal, Advanced Disposal is committed to our safety and yours.

**Subcontracted service*

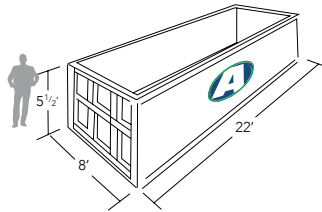

20-YARD ROLL-OFF CONTAINER

20-yard containers are used for extremely heavy materials such as dirt, rock and concrete, or smaller do-it-yourself projects.

30-YARD ROLL-OFF CONTAINER

30-yard containers are used for a mixture of materials such as wood, sheetrock and metal, and are often the size of choice for many commercial contractors.

40-YARD ROLL-OFF CONTAINER

40-yard containers are used mainly for larger, bulkier items that are not extremely heavy, such as pallets.

COMMERCIAL SERVICE STANDARDS – OUR PROMISE TO YOU.

Delivery of New Containers

- All containers will be clean, fresh and clearly marked with company decals and phone numbers.
- Delivery will be made on the due date.
- Delivery paperwork turned in by 5 p.m. may be scheduled for next-day delivery.

Roll-Off Haul Requests

- Guaranteed next-day service; however, same-day service will be given if possible.

Extra Pickups and Overloaded Containers

- Guaranteed next-day service; however, same-day service will be given if possible.
- Driver will call the Advanced Disposal dispatch office and ask dispatch to notify the customer of an overloaded container and educate the customer regarding safe capacity levels.

Blocked Containers

- Driver will attempt to service blocked containers by speaking to someone on-site or calling the Advanced Disposal dispatch office to notify the customer of the blocked container.

Emptying Containers and Spillage

- If waste comes out of a container while it is being emptied, the driver will pick it up.

FOCUSED ON ENVIRONMENTAL INTEGRITY

Advanced Disposal is deeply committed to ensuring a clean and safe environment for our employees, our customers and our communities. When it comes to your environmental responsibility, we can give you the peace of mind you need. We limit your liability by employing qualified professionals and complying with all local, state and federal regulations. So you can be sure that your waste will be cared for in a safe and compliant manner.

LEED COMPLIANCE AND RECYCLING SERVICES

Our commercial and construction services are designed to help our clients meet their recycling goals including LEED certification. Designed to reduce your operating costs and enhance your profitability, our services can also improve employee satisfaction and productivity. But from a broader perspective, we can help you protect and enhance our ecosystem, improve air and water quality, conserve natural resources and reduce solid waste.
